

Hornet's Nest

Last year two empty hornet's nests were removed from trees behind the library. Now they're on display in the library! See one nest intact and a cross section of the other in the display case near the family restroom. Also check out some very cool facts about the baldfaced hornets who made the nests.

The library features a variety of exhibits in the two glass display cases. If you have a collection of items that you are interested in having displayed in these cases, please contact Cheryl Hill at 503-656-7853, x3016, or chill@westlinnoregon.gov
